

BOLL 14, 5/8" MOUNT VELCRO

Fixing Velcro grip for angle polishing machine is used to fix a polishing fur with Velcro.

The BOLL fixing grip hold a IOS certification for safety sign B.

Application:

Fix the grip in the angle polishing machines provided with bolt M14 or 5/8". Press a centring sleeve into the Velcro polishing fur and put it in the disk hole. Press it fast several times on the entire surface so that the two joining elements fit together well. Keep the sleeve for another operation.

Comments:

All technical specifications are approximate. We recommend to test the material to make sure it is appropriate for the specific application. The producer reserves the right to improve the product and change its technical properties, including modifications to the specification.
