PROPERTIES

High strength adhesive based on methacrylates used for permanent bonding the rear view mirror on the windscreen and also for bonding car aerials, etc.

COLOUR

 amber

METHOD OF USE

Remove the remains of old glue and mark the place where the mirror is to be fixed. Clean and degrease the glass surface and mirror base. Cut the mesh to the shape of the mirror base. Apply adhesive to the mirror base after removing the mirror (only for dismountable mirrors). Evenly coat the contact area with a thin layer of adhesive. Place the mesh on the adhesive layer and immediately attach the mirror base/mirror to the glass. Hold for 1 minute and do not move for another 15 minutes. The adhesive is fully cured within 24 hours.
