

STRUCTURE LACQUER FOR PLASTIC

EAN code: 5907588403221 item no.: 0014011 grey, cap.1000ml
EAN code: 5907588402538 item no.: 001401 black, cap.1000ml

+ PROPERTIES

Structural varnish for plastic is a fast-drying and well-binding paint based on acrylic resins. Perfect for painting plastic bumpers, moldings and other plastic elements with a spray gun. Creates an attractive, structural, durable coating in black or dark grey matt. This paint can be applied directly to all plastic surfaces without using primer.

METHOD OF USE

Thoroughly clean and degrease the surface. Cover adjacent areas with paper. Before use, shake the can well for approx. 3 minutes. Apply with a spray gun (pressure 2-3.5 bar) with a nozzle diameter of 1.5-2 mm from a distance of 15-20 cm. After about 30 minutes, a second layer can be applied. After drying (minimum 6 hours) the structure can be painted. When diluting, use a maximum of 5-10% thinner for acrylic paints, depending on the nozzle used. The type of structure can be adjusted by changing the distance from the sprayed surface or changing the air pressure.

↓ APPLICATION

Thoroughly clean and degrease the surface

Shake thoroughly for approx. 3 minutes

Nozzle 1.5 - 2.0 mm
Pressure 2 - 3.5 bar
Number of layers 2

Evaporation time 30 min

After drying (minimum 6 hours) the structure can be painted.

STORAGE CONDITIONS

Protect the product from excessive heat and cold. Avoid direct exposure to sunlight. Store in a dry place.

SHELF LIFE

24 months from the production date placed on the package.

SAFETY

See Safety Data Sheet.

OTHER INFORMATION

All technical data are approximate values. We advise you to test the material to ensure suitability for your specific application. The producer reserves the right to improve the product and change the technical conditions with the possibility of making changes inside the specification.
