

CLEANER DIESEL PARTICULATE FILTERS

EAN code: 5907588405492 item no.: 0014098 cap. 400ml

PROPERTIES

It is an agent used for non-invasive cleaning and regeneration of DPF without the necessity of its disassembly. Thanks to its formula it dissolves carbon deposits and contributes to their subsequent removal together with exhaust fumes from the car exhaust system. The preparation can be used in all types of diesel engines and its application improves engine operation and extends filter life. The product evaporates after use without leaving any residue.

COLOUR

 yellowish

METHOD OF USE

Before application, the temperature or pressure sensor on the engine side must be removed from the DPF, where the agent will be introduced using the special nozzle provided. We apply the preparation in series of 5 seconds in different places directly on the DPF until the can is completely empty. After the application is completed, a test drive of about 20 minutes is recommended in order to dissolve the preparation.

NOTES

USE ONLY WHEN THE ENGINE HAS STOPPED AND COOLED DOWN.

PHYSICAL PROPERTIES

density at 20°C:	1,072 g/cm ³
odor:	characteristic

STORAGE CONDITIONS

Protect the product from excessive heat and cold. Avoid direct exposure to sunlight. Store in a dry place.

SHELF LIFE

24 months from the date of production placed on the package.

SAFETY

See Safety Data Sheet.

OTHER INFORMATION

All technical data are approximate values. We advise you to test the material to ensure suitability for your specific application. The producer reserves the right to improve the product and change the technical conditions with the possibility of making changes inside the specification.
